

**GLACIER WALK:** Bombers Abroad were outfitted with crampons, helmets and pick axes for a hike as they took on the Sólheimajökull on Day 3 of their Iceland adventure. While on the walk, the group learned that when the glacier melts (receding at approximately 60 meters per year), CO<sub>2</sub> is released. The sights of the glacier ranged from snow, volcanic ash and ice in shades of white to blue due to light interception.

After almost 18 months of planning and fundraising, 11 Bombers, including seniors Joseph Jordan and Sierra Knight and sophomores Katherine Bollig and Emma Kielsmeier, traveled to Iceland for a seven-day international adventure. Photos are amazing but the experience was *breathhtaking.*

# Glaciers, Geysers & Waterfalls

Bombers Abroad in Iceland  
Spring Break 2019

1. One of their first adventures in Iceland was to the Þingvellir National Park. Sophomores Emma Kielsmeier and Katherine Bollig along with senior Sierra Knight and junior Samantha Neys tried to keep their eyes open in the snow. 2. The snow stopped for the group to grab a photo at Þingvellir National Park. 3. Free time in downtown Reykjavik meant a stop at the gelato shop for senior Sierra Knight and junior Liz Schmidt. 4. Sophomore

Emma Kielsmeier, senior Joseph Jordan, junior Liz Schmidt and senior Sierra Knight learned about geothermal energy at the Hellisheiði Power Station. 5. Sophomores Katherine Bollig and Emma Kielsmeier tried not to get soaked at Seljalandsfoss. 6. Before departing Iceland, the group made sure to grab a photo with their in-country tour guide, Lewis. 7. Senior Sierra Knight clicked her heels in front of Gullfoss.
