

Autumn

From celebrating Homecoming Week to cheering on our Hawks, students began the school year with many moments that **you had to be there** for.

You had to be there when Governor Kim Reynolds launched the newly formed welding apprenticeship program and when the old chemistry room received a make-over. When rain flooded the streets and damaged cars causing school to be canceled was another memorable moment. An especially electric moment involved sixteen girls clinching the WaMaC title and punching their ticket to State.

You just had to be there when students and staff turned moments into memories.

Jumping up and down, Carson Petton (10), Kyle Kelley (10), Jordan Bries (12), and Nicholas Casey (12) celebrate after the volleyball team wins the WaMaC East title.
