Polar Bear Crew is a student leadership initiative; students are recruited based on recommendations of peers and teachers who believe that students are strong leaders. Those students are then taken through a interview process with their peers to display their leadership skills and abilities. From there, students are selected by facilitators of their crew. Through student-led initiative, student leaders help change the school climate and culture and community to help make the school better for the students to be a part of. It's a place where students gain communication and leadership skills as well as meet new people and create new friendships.

Polar Bear Crew occurs during Polar Bear Time for the past few years, but this year it became a class during 6th block. It's an extended version of the Polar Bear Time class. Polar Bear Crew does many things for the school, such as plan dances, push student involvement, school spirit and are the leaders of the school. They also do many volunteer events giving students a chance to give back to the school and community, an example would be the Trunk or Treat event they put together with the help of sponsors and local volunteers. It's a good opportunity for North and the community to unite.
