

As you could see, even in 2019, we still embraced our **golden** side. In botany we studied marigold's and sun flowers. In chemistry we studied **gold** and all the other elements. On Friday nights we adorned **purple** and **gold** as we supported our Dragons underneath the **golden** lights on our fields and in our gyms. We represented the **purple** and **gold**, as our show choirs dominated the stage and our mock trial teams incinerated their opponents in the court room. We took on new challenges. The drama department tackled "Les Miserables" and an extremely confusing murder comedy which turned out to be comedic **gold**. So yeah, **gold** is kind of important.
