

GROWING

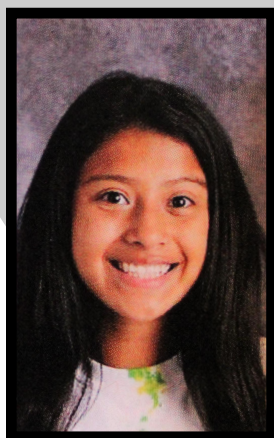

UP

From Freshmen to Seniors

Q: Which year of high school has been your favorite so far?

**Julie
Munoz**

A: My favorite year was definitely my junior year. I have a lot of really cool memories from then. It's the year I started cheer and I became friends with a bunch of new people. I really started to surround myself with people that I know really care about me. It really helped ground me to where I am now. I think junior year really helped me evolve as a person in the best way. I am a little sad that it didn't end exactly the way that I wanted it to, but the beginning of the year was definitely one of the most memorable times of my life at Hoover.

Q: How was your freshman year different than your senior year?

A: There's definitely some obvious differences with things like Covid-19 and my age, as well as how I've grown up mentally throughout the years, but other than that not much. I've stayed true to myself and still excelled in school. I've continued to do what I love and stay on track with my goals!

Q: What's some advice you'd give your freshman year self?

A: Don't slack off. Get everything you need to done to prepare yourself for down the road.

Ben Renwick

Q: Was high school the same as you expected?

A: I didn't really know what to expect from high school, so I can't quite say! But it was definitely different from the stories my parents told me.
