

healthcare heroes

IN THE XAVIER COMMUNITY

The Arnolds

"My dad, Dustin, is the Chief Medical Officer and a physician at St. Luke's Hospital. His job is to oversee the doctors and set new guidelines for the COVID-19 pandemic. He has been at the hospital a lot, keeping things in line and running the hospital. My mom, Tonya, also works at St. Luke's in the foundation office and she has been receiving donated meals from a bunch of different restaurants for the doctors and nurses. She has been delivering meals as late as midnight and as early as 7a.m. Both of my parents have worked a lot of hours during this crazy time. Thank you mom and dad for being healthcare heroes! Your long hours of work and selfless care have not gone unnoticed! Love you both!"
