

be involved.

What do teachers enjoy doing on their snow days?

"I try to go snowmobiling, but most of the time, I end up shoveling."
• Jason Guyer (Staff)

"I catch up on my favorite TV shows on Hulu in my pajamas."
• Libby Allen (Staff)

"I watch Netflix and grade papers."
• Kyrstin Shelley (Staff)

dissecting science.

Anatomy and Physiology students turned work into fun. Dorise Nagel (12) enjoyed dissecting a pig. While she pulled out the small intestines, her friends had to hold her hair back. "It strung forever. It looked like a necklace," Nagel said. Torin Kehrli (12) also thought dissecting a pig was a fun experience. "It's something that I'm used to because I skin animals quite a bit," said Kehrli, who is an avid hunter. "Alex Kehrli and I

named our pig Piggysly," Torin Kehrli said. "We pulled off all the skin and then made a cape out of it and tied it around the pig's neck." The boys enjoyed the chance to go beyond the class expectations by squeezing all the juice out of the heart and cutting a cow's eyeball in half. "It was so cool!" Alex Kehrli (12) said. "Although it was fun for the kids," teacher Joan Salow said, "they also learned to connect all the systems we studied."

"Alex Kehrli (12) and I listened to 'It's Hip to be Square' while dancing around the pig," Torin Kehrli (12) said.

1. In Science Interactions I, Becca Hermann (10) examines her poster.
2. Helping out a student, Joan Salow, teacher, assists Dorise Nagel (12) with her dissection.
3. During Biology, Zach Lawson (11), Stephen Deutmeyer (11), and Casey Schaul (11) adjust their microscope to get a better view of cells.

engaged scientists.

While Jessica Hilby (10) dissects a crawfish, Cassie Ellers (10) looks over directions.

Looking through a microscope, Mitchell Callan (10) studies cheek cells.

Teacher Marcia Powell explains Astronomy to Ashley Heims (11) and Katie Scherbring (11).

In Introduction to Engineering, Joel Ott (11) competes in an instant challenge.

FOOLA contributes to community.

1. Arranging roses for Valentine's Day, Ali Vaupel (9) prepares to hand them out to students.
2. Sewing baby blankets for the Regional Medical Center, Dani Dunphey (10) concentrates on stitching. Students made blankets for newborns with fabric donated by the Quiltmaker's Shoppe.
3. Becca Conway (10) presses a seam on a baby blanket.
4. Presenting her project "A Step in the Right Direction," Anna Noggle (9) explains her thoughts on giving shoes to the needy. She presented her project February 4.

<<< snowmobilers. >>>

Students Brave the Cold on Their Sleds

Snowmobilers Trent Shaw (9), Jake Gritzner (12), Brendon Shaw (11), and Tyler Wessels (12) ride their snowmobiles after school. They rode their snowmobiles to school over five times throughout the winter.

"We always thought it would be fun to snowmobile to school, so we finally did it," Brendon Shaw (11) said.
